# Motivation

I wish to express my interest in the above stated scholarship in the fields listed below in their order of priority.
1.MSc. Mechatronic Engineering – Full Degree studies, University of Debrecen
2.MSc. Electrical Engineering - Electronics and automation Era-06.5 - Széchenyi István University

These are two areas that I have great passion in from since I was young. Some of my areas of interest include embedded systems, Iot, Robotics, Electronics design and also Smart design of various embedded systems.
I am a Kenyan citizen, a graduate from JKUAT University (2018) with a second class- upper division in Bsc. Control and Instrumentation (Physics Department). I am currently a trainer (tutor) at Kisiwa Technical Training institute, Bungoma in the Electrical Department on B.O.M. terms.
Being awarded the chance to study further in the above stated disciplines would be an incredible opportunity for me and one I intend to seize wholeheartedly without reservations. It would also be a step towards achieving my objectives and desires.
In my undergraduate studies I gained immense knowledge in various disciplines including control systems, industrial automation, embedded systems, Microcontroller systems, Robotics and to a smaller extent gained some knowledge in ICT, Networks, Computer Aided Design and Drawing. In my high school I did very well in mathematics and sciences and am confident enough of the knowledge I have.
The world is moving towards advanced technological era in various disciplines including Iot and smart systems where smart devices must be designed to cope up with the changing technology. Manpower is therefore needed to cater for the said technological need. Skills gained in Mechatronics Engineering would go a long way in filling the manpower and skills gap. If given an opportunity to study Architecture, I would focus on smart designs that are efficient, reliable and environmental friendly.
In my society, I am a role model to many young students. Many grow up with the desire of being like me. Some look up on me for mentorship. I wish to also gain more skills and knowledge so that I would realize my dream of coming up with am embedded systems company and to educate the society on technology. I would also use the knowledge and skills to regularly train my fellow youths in higher levels of learning on technological advances.
I have decided to apply to study in Hungary. The country has highly ranked Universities with focus on practical skills. With the city itself having Companies including pharmaceutical and other companies that would give me enough experience and skills. Hungary boasts of precisely designed architectural buildings like the parliament. I would like to gain first hand experience and be inspiration from these great ancient works.
The major challenge that I would encounter is Language barrier difficulty. I would therefore not be able to interact with a larger population. I purpose to gradually learn of the Hungarian language and cultures.
Therefore I implore you and the committee to consider awarding me the scholarship so that I go a step towards my objectives and to participate in advancement in the energy field.
Kindly consider my request.
